

# Rayco Electronics Product Capabilities

An AS9100 Company  
MIL-PRF-27 Certified

## EMI Filters

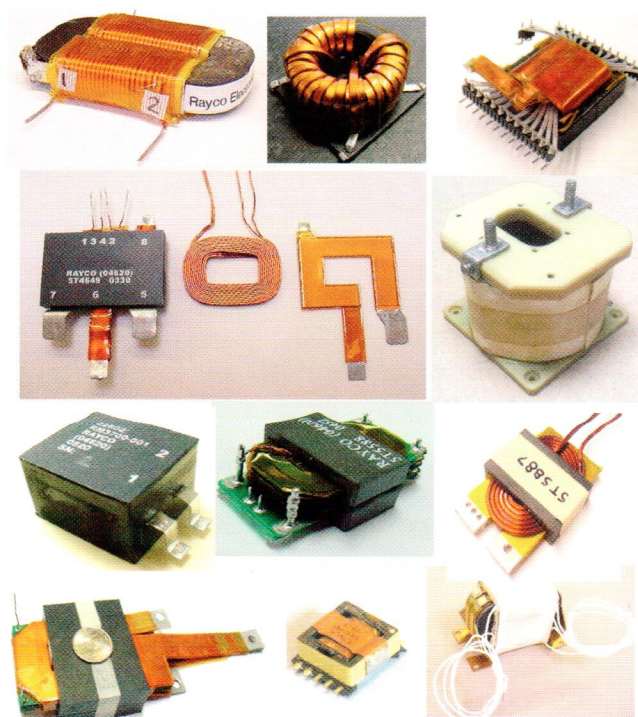

- High reliability input/ output powerline filters
- High voltage | high current | single stage | multi stage filters for MIL| AERO | Avionics applications
- Fully integrated filter design
- Strong in house design expertise and testing

## Board Level Power Magnetics

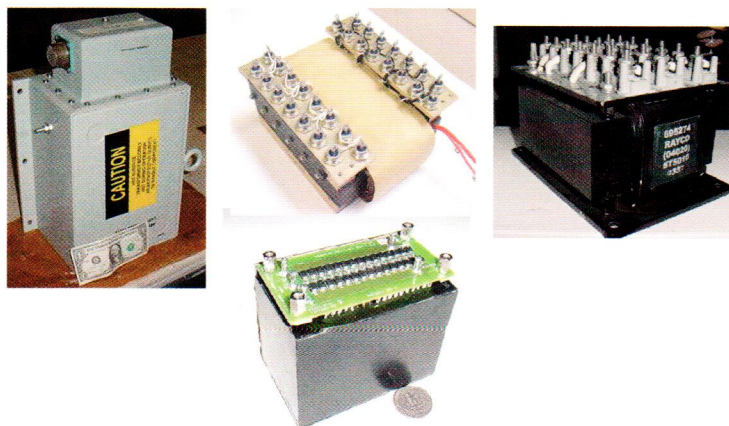

Transformers | Inductors | Chokes | Toroids | Planar

- Magnetics with high energy density
- Max size and weight reduction using innovative core materials and wire
- Max thermal performance with creative packaging

## ATRU's | TRU's | Magnetics Assemblies

- 9-phase (18pulse) | 15-phase (30-pulse)
- Passes DO-160 requirements
- High reliability | High efficiency
- Customized for maximum reduction in weight and dimensions

## Why work with Rayco?

- Quick sample turn-around
- Utmost quality
- Strong in-house engineering & testing

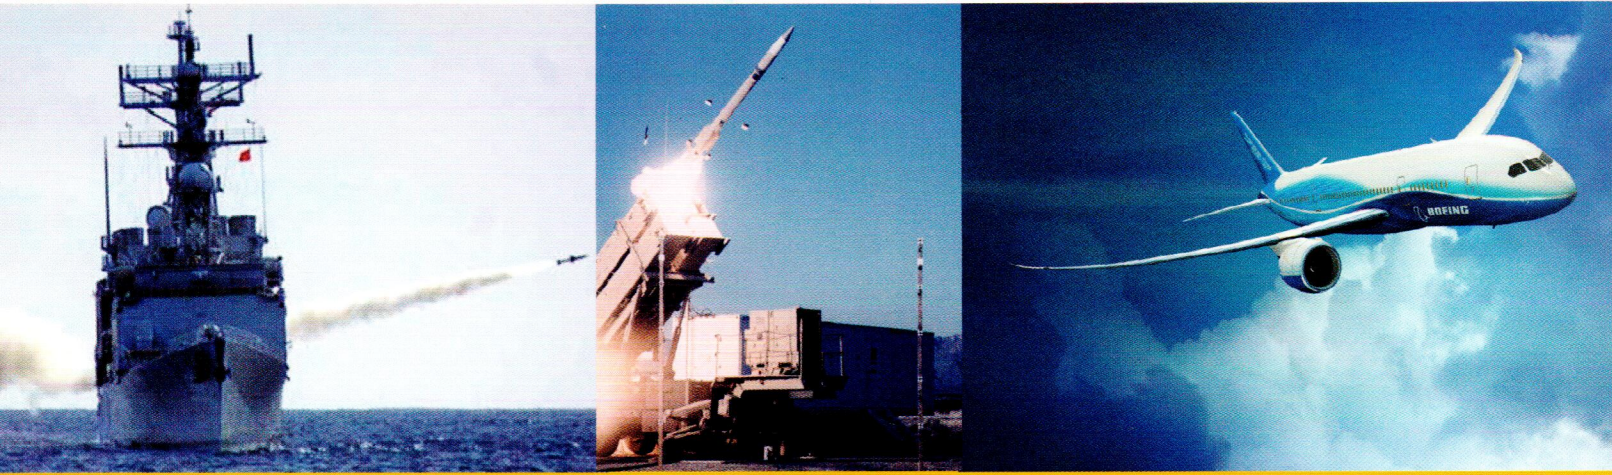

The "Power" Behind Magnetics
